Subject: Installation of Marconite based Earthing Station.

Dear Sir,

As per our requirement and request, your company has provided the knowledge and installation of 5 Nos. of maintenance-free Earthing stations based on Marconite (conductive concrete based earthing) at our Electron Beam Centre, Kharghar, Navi Mumbai. Out of these 5 earthing pits, 4 Nos. are connected in parallel network to achieve an earth pit resistance of 0.65Ω which is required for our HV pulse power applications. We are glad to get these maintenance-free earthing stations having less than 1 Ohm.

Thanking you,

Yours faithfully,

(R. I. Bakhtsingh)
